

NL Anchor Bolt (Production per order)

(Unit : mm)

Product Features

- No loss of base metal by increasing the effective cross-sectional area of the threaded portion over the effective cross-sectional area of the base metal.
- Please specify fixing length after structural calculation.
- Application : Reinforcement of load-bearing wall, PC bridge girder reinforcement, Structure anchor bolts.

Screw	Diameter (D)	Screw length (S)	Length(L)							
			300	350	400	450	500	550	600	620
M12	10	30								
M16	13	30, 35								
M20	16	40								
M24	19	50			Production per order					
M27	22	60								
M30	25	60								

● Please specify the surface treatment.

Example of Use

Example of Use

- Underground beam joint bar
- Reinforcement of load-bearing wall
- PC bridge girder reinforcement
- BOX culvert stud
- Joint bars for structural concrete connection

Construction Example

- ① Insert drive into in advance
- ② Set the NL anchor bolt and cast concrete
